

MACtrans III SP T.C. MR 980 Century 8 White

FACE MATERIAL

ADHESIVE

BACKING

White dull synthetic film, two sides coated, with excellent printing properties.

Film with high opacity, tear strength, excellent dimensional stability and printing properties. The extremely smooth coated surface gives even transfer of ink from the ribbon * and excellent printing characteristics of most common processes thanks to its rapid ink absorption property. It is also recommended that preliminary test be carried out for certain particular printing methods such as silk screen process.

* Note :Thermal transfer printing quality is dependent upon the ribbon quality and compatibility with face stock.
